

# Cumulux Cloud Computing Services

## ABOUT CUMULUX

Cumulux is a leading Cloud Computing enabler with a mission to accelerate Enterprise Cloud adoption. Cumulux was founded by Microsoft veterans with a strong belief that Cloud Computing is a phenomenon that is changing the way Enterprises architect, develop, deploy and manage applications. Cumulux provides products and services that enable enterprises adopt Cloud Computing and rapidly realize economic value.

Cloud Computing is fast emerging as a cost effective, scalable and agile alternative to installing, running and maintaining in house servers and software.

Cumulux offers comprehensive services and products to enable enterprises learn, strategize, develop and operationalize Cloud Computing applications. Our unique service offerings help enterprises develop and deploy software that drive

- Lower upfront costs
- Shorter time to market
- Reduced operational overhead
- Elastic scalability

## Architecture Services

Cumulux architects analyze the 4 pillars of Enterprise Architecture - Business, Process, Information and Technology Architecture and drive the following deliverables

- Architecture Roadmap based on a self developed "Cloud Computing Maturity Model"
- Portfolio Analysis to identify applications that are "Cloud Ready"
- Vendor Evaluation and ROI Analysis

## Strategy Services

Cumulux helps enterprises understand the implications of the Cloud Computing paradigm, evaluate the various platforms and vendors, explore the impact on ROI and plan for a phased adoption roadmap. Cumulux acts as a trusted advisor to the CIO and the Enterprise Architecture team to roll out strategies to ensure a successful enterprise wide adoption of Cloud Computing.

## Education

Once your Enterprise is ready to embark on the journey of Cloud Computing, Cumulux can help get your team ramped up on the various platform offerings. Our unique Cloud Computing education offering includes architectural workshops, in-depth hands on boot camps and end user training on various Cloud applications. The intended audience for these trainings includes the architecture team, the development groups and end users.

## Development Services

Cumulux can build rapid prototypes to validate the concepts and establish the viability of the cloud paradigm. Our scalable development team is well trained in the latest advancements in Cloud Computing and utilizes an Agile Scrum based development process. Our engineering team comprises of experts in development, security, scalability and operations enabling us to deliver services along the full enterprise software development lifecycle.
